Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 December 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Status of Claims

Claims 2-4, 6-8, and 10-20 are pending. Claims 1, 5, and 9 have been cancelled.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

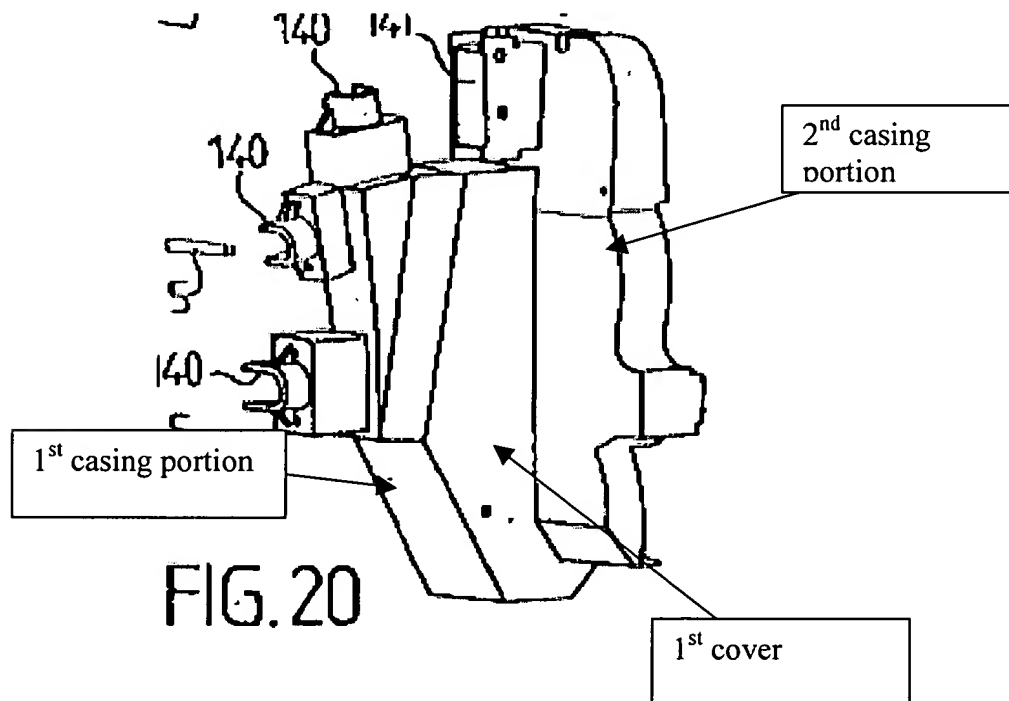

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over DeBlock US6497436 in view of case law.

As to claim 20, DeBlock discloses, a door lock system for a vehicle comprising: a housing (see Figure 20 below) comprised of a main body, a first cover and a second cover 2, the main body comprising a first casing portion and a second casing portion, with a first space between the first cover and the first casing portion, the second casing portion having an open end closed by the second cover with a second space between the second cover and the second casing portion, the first and second casing portions being connected to each other and being oriented relative to one another such that the first casing portion and the open end of the second casing portion face in directions perpendicular to one another; a latch mechanism 14,16 adapted to latch a vehicle door to a vehicle body and supported by the second cover (14 and 16 are supported by axles mounted to holes in the second cover 2); and a link mechanism including an electric driving source 66 (see Figure 11) and a plurality of lever members 62,68 for selectively locking and unlocking the latch mechanism (col.10, ln.25-50), the link mechanism being accommodated

Art Unit: 3677

in the housing with each of the lever members being disposed within at least one the first space and the second space, the lever members including an open link 63,64 coupled to the electric driving source to selectively lock and unlock engagement of the latch mechanism, and both the electric driving source and the open link being disposed within the first space. The difference between the claim and DeBlock is the claim recites, the first casing portion having an open end closed by the first cover. DeBlock discloses the claimed limitations except for the first casing portion having an open end closed by the first cover. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the first cover and the first casing portion separate, since it has been held that constructing a formerly integral structure in various elements involves only routine skill in the art. *Nerwin v. Erlichman*, 168 USPQ 177, 179.

Allowable Subject Matter

Claims 2-4, 6-8, and 10-19 are allowed.

The following is an examiner's statement of reasons for allowance: as to claims 1 and 8, the claimed structure includes the perpendicular casing portions, the first cover and first casing portion creating a first space, the first space holding the electric driving source, and the electric driving source above the insertion groove. The prior art of record fails to show this combination of claimed elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3677

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
